

A SAFER HOME

WITH SOLUTIONS FOR EVERY ROOM

SUPPORTING INDEPENDENCE

SOLUTIONS WHEN NEEDED MOST

When living alone has its stresses and challenges, Northwood Intouch is here to offer solutions and to help give caregivers peace of mind.

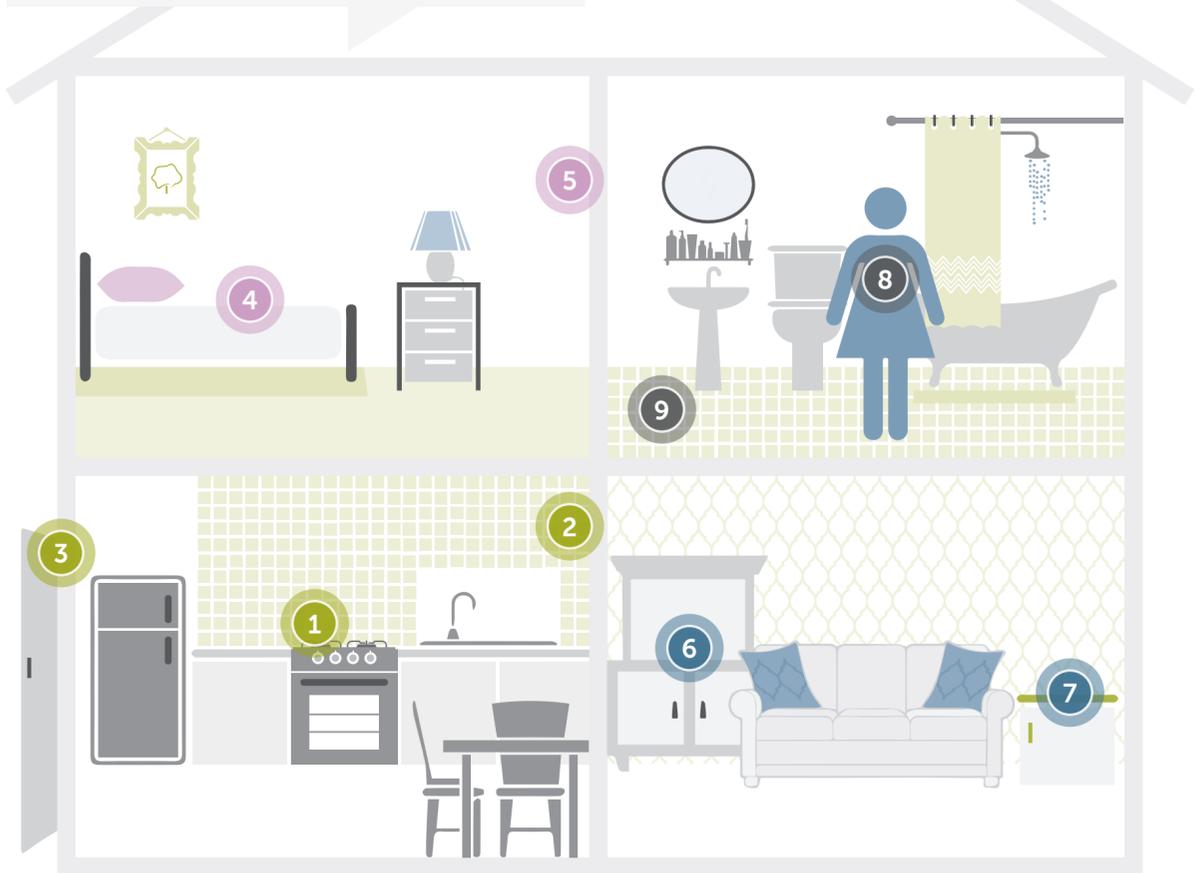

✓ Our solutions are **unobtrusive and easy to add or change** as the need arises. As needs change, so do our solutions.

✓ Alerts can go directly to a **caregiver or Response Centre** to ensure quick response.

✓ Wireless – **no unnecessary costs or complicated installation.**

✓ Our sensors are **affordable with no fixed contract.** Bundles allow savings while offering flexibility to mix and match.

✓ Customizable – **every solution is tailored to the individual** using it.

SOME OF OUR IN HOME SOLUTIONS

1 STOVE SENSOR
Cooking fires are the #1 cause of home fire injuries according to the National Fire Protection Association. Unattended cooking equipment is the leading contributing factor to kitchen fires, with the elderly and persons with disabilities being especially vulnerable. The sensor turns the stove off automatically if someone forgets.

2 TEMPERATURE SENSOR
If too hot or too cold, this sensor will let someone know. Could indicate loss of heat in winter or extreme hot unsafe conditions in summer.

3 DOOR ALARMS
Used as an early alert for people who wander or used as a home security system to provide more peace of mind.

4 BED ALARM
Alerts when someone has gotten out of bed and may be at risk of a fall or wandering. Lets Caregiver know immediately.

5 MOTION DETECTOR
Can use for security or as a way to monitor if someone hasn't gotten up and started their day at the regular time, possibly indicating something has happened or they are not well.

6 BASE UNIT
The heart of the monitoring system for all of the sensors in the home. This can be placed anywhere in the home.

7 MONITORED PILL DISPENSER
The medication dispenser provides the right dose at the right time and then lets someone know if a dose has been missed.

8 AUTOMATIC FALL DETECTOR
When it detects a fall, it automatically places a call to the response centre for help.

9 FLOOD DETECTOR
Early alerts for potential flood, helping to save on a flood of repair bills.

Whether memory issues are related to **dementia, Alzheimer's or another medical condition**, or just having too much on your mind, **our sensors monitor your environment when you're not able to.** That means increased peace of mind for you and your caregivers.
