- ✔ Home alone or living alone
- ✔ Managing a disability or chronic illness
- ✔ At risk for falls, breathing difficulties, heart conditions or mobility issues
- ✔ Discharged from the hospital needing added support at home

3 BUTTONS TO PICK FROM:

FACT: THE RISK OF HAVING A FALL INCREASES WITH AGE.

Women fall at a significantly higher rate than men. Women 65+ are twice as likely to fall than men the same age.

Falls are the leading cause of injury to seniors in Nova Scotia.

Getting help quickly can decrease the chances of complications.

Whether you're the caregiver or the client, **we are here to help you take charge of your life and independence** and provide peace of mind.
